

FINANCIAL INFORMATION

PRICES, PAYMENTS, CANCELLATION AND REFUNDS

APRIL 2025

Cambridge IVF
Creating your future

Costs of fertility treatments and other services at Cambridge IVF are outlined below.

Payment for procedures and tests will be taken at the time of booking. Packages are payable in full before treatment starts, with the exception of Duo and Multi-Cycle for which an initial payment is taken followed by payments for the second and third cycle (if proceeding with these). We are unable to offer monthly payment plans.

If you have any questions about fees, payments or refunds, please contact us. We will discuss your options at every stage to help you achieve the best possible outcome.

ADMIN FEE FOR TRANSPORT OF GAMETES OUT OF CIVF TO OVERSEAS CLINIC	£300

TREATMENT CANCELLATION AND REFUNDS

Unfortunately, treatment cycles are occasionally cancelled for clinical reasons. For instance, patients may fail to respond adequately to stimulation, meaning that egg collection is not possible. Conversely, some patients may over-respond to stimulation and the medical team may advise that there is a very high risk of developing Ovarian Hyper stimulation Syndrome if treatment continues.

We understand that any decision to cancel is a serious disappointment to you. Hence we try to avoid situations in which we are forced to advise cancellation. However, sometimes we must do so in the interests of your health and well-being or where an outcome is not within our control. Cambridge IVF staff will always include you in these discussions and be open about the reasons for advising cancellation.

ALL CYCLES REFUND

CANCELLATION BEFORE EGG COLLECTION

If your cycle is cancelled at any stage before egg collection, a refund of £650 will be given (no refund on medication).

CANCELLATION AFTER EGG COLLECTION

A £200 refund will be given.

COMPLETE FAILURE OF FERTILISATION

In very rare cases, where none of the eggs collected fertilise and there are no embryos to transfer, £200 will be refunded.

FREEZE ALL EMBRYOS

In certain circumstances, it may be necessary to freeze all of your embryos for clinical reasons, most commonly because of the risk of OHSS. In these circumstances, there will be a cost of £709 which will cover the cost of vitrification, one frozen embryo transfer with medication if required and the first year of storage.

FROZEN BLASTOCYST TRANSFER/FREEZE ALL

If a frozen blastocyst transfer is cancelled before thawing, there will be a charge of £150 plus any medication costs incurred.

If a frozen blastocyst transfer is cancelled after thawing there will be a charge of £250 plus any medication costs incurred. If we cancel your natural cycle frozen blastocyst transfer due to the expected day of transfer falling on a Sunday a full refund will be made.

DI / IUI

If a cycle of DI or IUI is booked but then cancelled there is a fee of £250.

Any refunds will be paid once our finance department has received confirmation of the change in treatment from Cambridge IVF staff. Any outstanding costs will be deducted from refunds. Refund payments will be to the card used for the initial payment.

FURTHER INFORMATION

PREGNANCY SCAN

An early pregnancy scan at Cambridge IVF or Ipswich Hospital is included in your package price. Further specialist pregnancy scans are available from Cambridge Fetal Care at the Rosie. Visit www.fetalcare.co.uk or call 01223 217227 for further information and up-to-date pricing.

MEDICATION COSTS

Most of our IVF packages included medication up to pregnancy testing. Egg Freezing packages include medication for each cycle. Medication is an additional charge for Frozen Embryo Transfers and IUI package. Lubion is not included in any package and will be paid for separately if required at cost price. Post pregnancy test medication is additional to the all-inclusive package prices and will be invoiced separately. All medication prices are inclusive of VAT and include home delivery.

A charge of £75 will be added for Saturday deliveries. Please be aware that occasionally further medication may be required due to a number of factors including dose, length of prescription and whether the type of medication has to be changed, therefore on occasions further medication costs may be incurred with additional delivery costs.

Payment for consultation and pre-treatment screening tests are at the time of booking. If a consultation is cancelled with less than 48 hours' notice, no refund will be made. Payment for treatment packages, additional services and medication are payable prior to the commencement of treatment. If you decide to cancel your treatment after your consultation but prior to receipt of medication and start of treatment, the package price will be refunded.

**Payment can be made by credit card / debit card over the phone
or in person at the Cambridge IVF unit.**
